in pleading for this "faithful wife's" welfare who has been abandoned by a materialistic, mercenary who was too much of a coward to emulate that Patriots, Nathan Hale etc., etc. He implies that he has "good evidence" that Gary is or has practiced homosexuality and due to his rather abnormal behavior over here and overseas Barbara's emotional health has been affected. All this he wants to bring to the public's attention at the same time he says Mr. Khrushchev is supposed to visit the United Nations in early October. (Perhaps, Sam Jaffe gave him this tip.) The whole thing is naturally quite grandiose and to make things even more sensational he plans to have press conferences, inviting TV, radio, and international reporters to give his stories very wide coverage.

Now, Morse, the above rather ridiculous story may not be as fantastic as it may sound. You can see this character is going to attempt a great black mail scheme all wrapped up in the respectability of law in allegedly protecting the rights of Barbara. Just how he is going to do the impossible of whitewashing Barbara is beyond comprehension in view of what is public knowledge here. I really do not think it too important to him if he loses. It is the notoriety which would become associated with such "juicy" sensational material.

The thing that worries me about this affair is in event either side subpoenas me how should I testify? Can I legally dodge questions that would reveal my close association up there and other matters I have held inviolate? Which laws take precedent, local or those involving possible breach of National Security Laws. There may be no need to concern myself with such matters as above but I suspect every effort will be made to embarrass me to the advantage of this lawyer's cause.

My apologies for this lengthy digest but I felt as the weeks move to the October deadline some sort of understanding should be reached as to what should be done in such unlikely eventualities as I have outlined.

Personal regard to your wife and all the group.
